Essential Guide to Educational Supervision in Postgraduate Medical Education

EDITED BY
Nicola Cooper and Kirsty Forrest
Both The Leeds Teaching Hospitals NHS Trust, UK

- Ideal for:
  - Consultants and General Practitioners who work with trainees
  - Educational supervisors
  - Postgraduate training programme organisers
- The topics covered are generic to medical education, whatever the specialty. Although the focus is on postgraduate medical education, many of the topics in this book are also applicable to undergraduates.
- Each chapter gives an overview of key topics in educational supervision with references and further resources. The book provides evidence and theory when applicable, but is deliberately practical, with case studies and tips for good practice.

CONTENTS
Foreword
Introduction
1. How to be an educational supervisor (Carolyn Evans).
2. Personal support and mentoring (Judy McKimm).
3. Dealing with doctors in difficulty (Rosalind Roden).
4. Career planning and advice (Jane Howard and David Clegg).
5. Putting a curriculum into practice (Nicola Cooper and Colin Melville).
6. Teaching and learning (Kirsty Forrest and Sean Williamson).
7. Introducing narrative reflection (Kathy Rees).
8. Assessments and appraisal (Julian Archer).
9. The role of information technology (Sean Smith).
10. Quality assurance (Jonathan Beard and Nicola Cooper).
Appendix 1 – Judy McKimm and Rosalind Roden.
Appendix 2 – Alastair McGowan.

Teaching and learning

FAITH: spiritual history-taking made easy
David Neely & Eunice Minford
The place of spirituality in compassionate and holistic healthcare

Using a consensus method to develop labour ward learning objectives
James Grieve, Margaret Cruickshank & Jennifer Cleland
Developing new learning objectives to maximise training opportunities

Feeding and nutrition in infants and children: an interprofessional approach
Joanna Purdy & Moira Stewart
Providing for necessary training in nutrition in the undergraduate curriculum

Supporting the prescribing of junior doctors: a 360° approach
Anne Hesketh, Fiona Anderson, Fiona Drimmie, Lorna Scallan & Peter Davey
Development of a tool to identify shortcomings in prescribing and target effective support

Student involvement in widening participation

‘Back to school’ – medical students providing life-support training in schools
Kelechi Eseenu, Christopher Garnett, Scott Middleton, Izzy Okolo & Federica Amati
Widening participation in recruitment to medical training in underserved inner city schools

Digest

Students’ concerns about examining their peers
Lorna Mary Gibson

In brief

Online resources to support clinical skills teaching

From my bookshelf

Clinical skills teaching and learning
Patsy Stark

Letter to the editor

Undergraduate emergency medicine and pre-hospital care teaching: is it enough?
Daniel Furmedge & Jocelin Hall

Content

Editorial
Let them learn
John Spencer

Student selected components
Wilderness medicine: a teacher’s perspective
Richard Hardern
This innovative teaching approach to emergency health care in remote locations also offers insight into the skills required for team-working in more routine situations

Effective and transferable teaching methods from wilderness medicine: the students’ perspective
Laura Andrews, Benjamin Biles & Ian Taylor
Factors that made for success from the students’ point of view

Pre-hospital emergency medicine: its place in the undergraduate medical curriculum
Sarah Drake
A student argues the case for pre-hospital experience to be part of the core curriculum

Patients as educators
Patients with chronic diseases as partners in medical education
Rossana Salerno-Kennedy, Pat Henn & Siun O’Flynn
A method for actively involving patients in early clinical education

Assessment
Being an external examiner: what you need to know and do
Richard Hays & Lindsay Bashford
Discussion on the role and relevance of the external examiner

The seven deadly sins of assessment
Mike Tweed & Tim Wilkinson
A novel look at the practices and policies employed in assessment

Theory in practice
Supporting medical students’ workplace learning: experience-based learning (ExBL)
Tim Dornan, Albert Scherpbier & Henny Boshuizen
A model that links conditions, processes and outcomes in clinical learning

Improving undergraduate clinical neurology bedside teaching: opening the magic circle
Hedley Emsley
Using the experiential learning cycle as a framework for teaching

Clinical teachers
Understanding clinical teaching in times of change
Julie Ash
Appreciating the complexities involved in successfully employing change in clinical teaching and its impacts on health care
